Release Time IMMEDIATE

Date 24 July 2007

Number 23/07

BHP BILLITON PRODUCTION REPORT FOR THE YEAR ENDED 30 JUNE 2007

BHP Billiton today released its production report for the year ended 30 June 2007. Throughout this report, unless otherwise stated, production volumes refer to BHP Billiton share and exclude suspended and sold operations.

- **Annual production records achieved for natural gas, alumina, aluminium, copper, nickel, iron ore, manganese ore, and metallurgical coal; all underpinned by strong demand.**
- **Increased annual production achieved for energy coal, diamonds and manganese alloy.**
- **Petroleum production in line with prior year despite no new major project start-ups.**
- **Record annual production achieved at North West Shelf, Worsley, Western Australia Iron Ore, GEMCO, Queensland Coal, Hunter Valley Coal and Illawarra Coal Bed Methane (all Australia), Mad Dog (USA), Zamzama (Pakistan), Alumar (Brazil), Paranam (Suriname), Hillside, Bayside and Samancor (all South Africa), Mozal (Mozambique), Escondida (Chile) and Cerrejon Coal (Colombia).**
- **Quarterly production records achieved for the Alumar, Yabulu (Australia), Queensland Coal, Cerrejon Coal, New Mexico Coal (USA) and Illawarra Coal Bed Methane operations and for natural gas from Bass Strait (Australia).**
- **Third party infrastructure constraints on the east coast of Australia will continue to adversely impact our coal operations in the near term.**

	JUNE 2007 YTD	JUNE 2007 QTR	JUNE YTD 07 vs JUNE YTD 06	JUN Q07 vs JUN Q06	JUN Q07 vs MAR Q07
PETROLEUM					
Crude Oil, Condensate and Natural Gas Liquids ('000 bbl) (a)	56,723	14,461	0%	-1%	9%
Natural Gas (bcf) (a)	355.69	95.23	1%	-2%	10%
Total Petroleum Products (million boe) (a)	116.00	30.47	0%	-1%	10%

Total Petroleum Production – Total production was in line with the year ended June 2006 and higher than the March 2007 quarter. Natural field decline has been offset by improved facility performance and successful development drilling. There were no major project start-ups in the period. Higher seasonal gas demand in Australia also supported the improved result.

Crude Oil, Condensate and Natural Gas Liquids – Production was higher than the March 2007 quarter due to improved operational uptime and successful development drilling which offset natural field decline. Stronger seasonal gas demand also increased condensate production.

Natural Gas – Record quarterly performance from Bass Strait led to a 10 per cent increase versus the March 2007 quarter production.

	JUNE 2007 YTD	JUNE 2007 QTR	JUNE YTD 07 vs JUNE YTD 06	JUN Q07 vs JUN Q06	JUN Q07 vs MAR Q07
ALUMINIUM					
Alumina ('000 tonnes)	4,460	1,144	7%	7%	5%
Aluminium ('000 tonnes) (b)	1,340	334	2%	0%	1%

Alumina – Production and sales for the year ended June 2007 were all time records. Record annual output was achieved at all operations due to the continuing ramp up of the Worsley expansion and strong performance at Paranam and Alumar. Worsley exceeded its expanded nameplate capacity in the June 2007 quarter.

Aluminium – A sixth consecutive annual production record was achieved. Successful implementation of ongoing efficiency initiatives resulted in record or near record performance at all operations.

	JUNE 2007 YTD	JUNE 2007 QTR	JUNE YTD 07 vs JUNE YTD 06	JUN Q07 vs JUN Q06	JUN Q07 vs MAR Q07
BASE METALS					
Copper ('000 tonnes) (c)	1,250.1	342.1	7%	17%	-4%
Silver ('000 ounces) (c)	36,565	11,625	-20%	23%	5%
Lead (tonnes)	210,814	62,409	-21%	12%	-1%
Zinc (tonnes)	118,695	39,148	9%	42%	9%
Uranium Oxide Concentrate (Uranium) (tonnes)	3,486	988	-11%	14%	12%

Copper – An annual production record was set with the continued ramp up of the Escondida Sulphide Leach Project and Spence (both Chile). This was accomplished despite the impact of the industrial action at Escondida in August 2006. In aggregate, these two projects contributed 134,950 tonnes during the year. Partially offsetting this was lower output from Olympic Dam due to maintenance activities and reduced ore hoisting and grades.

June 2007 quarterly production was higher than the June 2006 quarter reflecting the continued ramp up of the recently expanded capacity.

As of 30 June 2006 the company had 274,280 tonnes of copper sales which were subject to a finalisation adjustment. The finalisation adjustment and provisional pricing impact as at 30 June 2007 will increase earnings^(d) by US\$108 million for the financial year. For the year ended 30 June 2007 the Group had 346,610 tonnes of copper sales that were provisionally priced at a weighted average price of US\$7,152 per tonne. The final price of these sales will be determined in the 2008 financial year

Silver – Record silver production at Escondida reduced the effect of the rehabilitation of ground support at Cannington (Australia). Production has recovered following the successful completion of the rehabilitation project in the March 2007 quarter.

Lead – Improved performance following the completion of the Cannington rehabilitation project was offset by declining grade.

Zinc – Production was higher than all comparative periods due to improved grade and increased proportion of zinc contained ore processed at Antamina (Peru).

Uranium – Variability of ore sources, lower grade, and ongoing maintenance activities at Olympic Dam impacted output for the year ended June 2007. Third party products were purchased from the spot market to meet contractual requirements. This will decrease earnings^(d) by US\$81 million for the financial year.

The higher production in the current period compared to the June 2006 and March 2007 quarters reflects increased grade and recoveries.

	JUNE 2007 YTD	JUNE 2007 QTR	JUNE YTD 07 vs JUNE YTD 06	JUN Q07 vs JUN Q06	JUN Q07 vs MAR Q07
DIAMONDS & SPECIALTY PRODUCTS					
Diamonds ('000 carats)	3,224	911	26%	56%	2%

Diamonds – Production increased versus the year and quarter ended June 2006 due to processing of higher grade ore containing lower value diamonds.

	JUNE 2007 YTD	JUNE 2007 QTR	JUNE YTD 07 vs JUNE YTD 06	JUN Q07 vs JUN Q06	JUN Q07 vs MAR Q07
STAINLESS STEEL MATERIALS					
Nickel ('000 tonnes)	186.3	47.7	7%	15%	4%

Nickel – Record annual production was driven by strong performances at all operations. All operations achieved near record production and sales.

	JUNE 2007 YTD	JUNE 2007 QTR	JUNE YTD 07 vs JUNE YTD 06	JUN Q07 vs JUN Q06	JUN Q07 vs MAR Q07
IRON ORE					
Iron ore ('000 tonnes) (e)	98,197	25,746	8%	6%	13%

Iron Ore – Records were set for annual production and sales volumes reflecting increased output from the expanded Western Australia Iron Ore operations.

Production was higher than the March 2007 quarter due to the continued ramp up of the expanded capacity at Western Australia Iron Ore and resumption of normal production levels following cyclone activities at Western Australia Iron Ore and planned maintenance at Samarco (Brazil) in the previous quarter.

	JUNE 2007 YTD	JUNE 2007 QTR	JUNE YTD 07 vs JUNE YTD 06	JUN Q07 vs JUN Q06	JUN Q07 vs MAR Q07
MANGANESE					
Manganese Ore ('000 tonnes)	6,009	1,519	14%	9%	5%
Manganese Alloy ('000 tonnes)	662	164	17%	7%	-7%

Manganese Ore – Higher production compared to all prior periods was driven by stronger customer demand.

Manganese Alloy – Production was higher than the year and quarter ended June 2006 due to optimisation of the product mix and improved facility availability and utilisation.

The current quarter's output was impacted by planned furnace maintenance at TEMCO (Australia).

	JUNE 2007 YTD	JUNE 2007 QTR	JUNE YTD 07 vs JUNE YTD 06	JUN Q07 vs JUN Q06	JUN Q07 vs MAR Q07
METALLURGICAL COAL					
Metallurgical Coal ('000 tonnes)	38,429	11,132	8%	21%	23%

Metallurgical Coal – Strong annual and quarterly performance across the Queensland Coal portfolio followed a light plant shutdown schedule. Records were achieved at Goonyella and Saraji. The ramp up of Poitrel continued (all Australia).

Our Hay Point Coal terminal (Australia) attained record annual and quarterly throughput, partially mitigating the impact of port constraints at third party facilities. These constraints at third party facilities are expected to continue in the near term.

	JUNE 2007 YTD	JUNE 2007 QTR	JUNE YTD 07 vs JUNE YTD 06	JUN Q07 vs JUN Q06	JUN Q07 vs MAR Q07
ENERGY COAL					
Energy Coal ('000 tonnes)	87,025	22,283	1%	2%	6%

Energy Coal – Production was in line with the year ended June 2006. Increased output from improvement initiatives was offset by extreme weather conditions at Hunter Valley Coal.

Production for the June 2007 quarter was higher than the March 2007 quarter due to the impact of a planned longwall move at San Juan (USA) in the previous quarter.

Third party infrastructure constraints on the east coast of Australia will continue to impact Hunter Valley Coal's export sales.

Production in South Africa will be lower in 2008 financial year due to the divestment of Koornfontein and potential divestment of Optimum and reduced output from the Douglas underground mine as it approaches shut down in the middle of the 2008 calendar year.

-
- (a) Excluding Green Canyon 18 and 60 fields (sold effective from 16 January 2006), Moranbah Coal Bed Methane (sold September 2006 quarter) and Typhoon / Boris (sold December 2006 quarter).
 - (b) Excluding Valesul which was sold effective from 1 July 2006.
 - (c) Excluding Tintaya which was sold effective from 1 June 2006.
 - (d) Earnings before interest and tax.
 - (e) Excluding Goldsworthy operations which were suspended mid calendar year 2006.

- (a) LPG and Ethane are now reported as Natural Gas Liquid (NGL), consistent with petroleum industry practice. Product-specific conversions will be made and NGL will be reported in barrels of oil equivalent (boe).
- (b) BHP Billiton completed the sale of Valesul on 1 July 2006.
- (c) Metal production is reported on the basis of payable metal.
- (d) BHP Billiton sold Tintaya effective from 1 June 2006.
- (e) Spence operations were commissioned during the December 2006 quarter.
- (f) BHP Billiton completed the sale of Southern Cross Fertiliser operations on 1 August 2006.
- (g) Iron ore production is reported on a wet tonnes basis.
- (h) Shown on 100% basis. BHP Billiton interest in saleable production is 60%.
- (i) Metallurgical coal production is reported on the basis of saleable product. Production figures include some thermal coal.
- (j) Shown on 100% basis. BHP Billiton interest in saleable production is 80%.
